

## 4.2 Edit Returned Training Grant Application

A training grant application may be returned by a SSG officer for further clarifications or to request for additional information. An authorised user of the company or training organisation will amend the returned training grant application with the required information and re-submits it to SSG for processing.

The process for editing a draft or returned training grant application is similar to that of a new Training Grant Application. The difference is that editing of a draft or returned training grant application is by retrieving the item from the user’s inbox with status “Draft” or “Returned” respectively, by clicking on the corresponding item under the “Ref No”.
